Brief Description about the Company and Nature of Work:

Code and fix software limited is a team of experienced coders highly efficient and concerned about the quality and dead-line. The company always interested in building new innovative mobile applications according to customers visions. Code and Fix has strong knowledge in digital media applications. They are a trusted web-service developer of press houses and magazine publishers. Most of this firms clients are from USA.

Tell us how you spend your time (project name, technology etc.):

I have completed 3 project, worked partially in a big project with my teammates. I have mostly worked on Google's API like as Google's map service, Google's distance matrix. Also I have developed a drag and drop menu like as in Wordpress. Here I also practiced the basic of LARAVEL framework. Basically I learned huge about PHP, JavaScript, Ajax, jQuery, and CSS3 from code and fix software limited.

Are you recommending this company for your junior? Tell why?

Yes, I recommending this company for my junior. Environment and learning facility is quite good. All the team member of this firm is very friendly and they never feel bore to teach us. In a word, I think code and fix software limited is the best place for internship and my junior will be benefited from this software firm. If anyone really want to learn something and sharpen one's skills with hard working and discipline one can make one's choice to go this company.
